

CREEP FEED GRINDING WHEELS

► **STERLING** offers creep-feed grinding wheels which are designed to perform well in high material removal operation without compromise on the form and finish. Be it continue dressing or conventional intermediate dressing, when it comes to creep-feed grinding. **STERLING** wheels achieve reduced dressing by superior form holding while removing material at high feed rate.

International Range

FEATURES

- High feed rates for faster cycle time.
- Controlled wear and longer wheel life.
- Burn free surface.
- Easy on the Dressing roll.
- Good form holding leading to good geometry and dressing

Premium Range

FEATURES

- High material removal.
- Burn free surface.
