

SPRING GRINDING WHEEL

► The Sterling product for spring end grinding with innovative specifications made from the grinding bond, structure and abrasive grain which will reduce your grinding costs.

Suitable for Machines like SIMCO, OMD, DAS, Wafios, Dorn, Herckelbout, Hack, Bamatec, Kamatech, Bennet Mahler etc.

We have developed new bond BS19 for spring end grinding wheel which is giving cycle time reduction 45% due to faster cutting and less dressing .

International Range

FEATURES

- Increased productivity due to shorter grinding cycle
- Extremely cool grinding process
- Longer wheel life
- Much less dressing adjustment required
- Advanced self-sharpening grinding effect
- Constant stability of the grinding process throughout the whole life of the wheel
- Universal specification for stainless and carbon steel
- Produced in all standard dimensions

Premium Range

FEATURES

- Less dressing
- longer wheel life
- Good cutting action
- Faster delivery
